

PRINTLAC[®] Gloss 20 H 9500

Printing varnishes for commercial web offset
(wet-on-wet)

Application

To improve gloss and rub resistance, this varnish can be applied from an unused inking unit using the wet offset process. Spot and full-surface varnishing is possible.

Special properties

- Outstanding gloss.
- Good drying.
- Good rub resistance.
- Minimal tendency to yellow.

Cleaning

We recommend standard washup solutions – as also used to remove heatset inks – for cleaning rollers, rubber blankets, printing plates, etc.

Special instructions

Apply in the same way as heatset inks, namely from the inking unit using the wet offset process.

Classification

Code per German law on hazardous substances (GefStoffV): None

Safety data sheet available on request.

How supplied

- 2.5-kg vacuum-sealed can
- 25-kg drum
- 200-kg barrel
