

INKREDIBLE

!NKREDIBLE GOOD NEWS FIX

Dampening additive for coldset web offset

9350 09

for water with a hydrogen carbonate content
up to 250 mg/l

9350 19

for water with a hydrogen carbonate content
above 250 mg/l

9350 29

for reverse osmosis water re-hardened with SALINOFIX®

Application

!NKREDIBLE GOOD NEWS FIX was developed specifically for use on web offset newspaper printing presses with non-contact dampening units (brush, centrifugal and turbo dampening units).

!NKREDIBLE GOOD NEWS FIX helps to quickly establish a stable ink/water balance and contributes to rapid clean running plates. Fount solution delivery to the printing plate can be considerably reduced.

Special properties

- Very fast clean running plates
- Formation of a stable, thin film of fountain solution due to a specific reduction of surface tension
- Good protection of printing plates
- Considerable reduction in the build-up of paper debris on the blanket
- Effective corrosion inhibitors offer excellent protection for materials

Despite the good buffer effect of !NKREDIBLE GOOD NEWS FIX, three versions are necessary in order to permit adjustment of all types of tap water qualities to the range between pH 5,0 and 5,3 that is most favourable for printing.

Quantity to be added

The recommended addition for use is 2 %

Labelling

Safety data sheet available on request

How supplied

10-kg plastic container
220-kg plastic drums
500-kg returnable drums
